1. grinding track

2. grinding track

3. grinding track

IMPORTANT INFORMATION

- Do not use the Neutrix grinder while it is in the case because the grinder needs air in order to cool the motor and the dust filter to avoid overheating.
- After several repeated grindings, Neutrix can overheat and require cooling time between grindings.

- It is advisable that the person performing the cleaning wears the necessary protective gear.
- In order to avoid transport damage keep the Neutrix in the case and ensure proper packaging of the case
- If it is necessary to change the grinding disc, please follow the steps in the manual or see the video shown in the QR code.
- Please return full dust filters to the distributor.
