

Dear distributor

We are pleased to introduce our upgraded AutoGrind Digital and AutoGrind-S Digital to you, now officially referred to as AutoGrind Digital V3.

The upgrades to our AutoGrind Digital are primarily aimed at enhancing the durability of the pins for the bayonet lock in the axle module.

As part of this upgrade and due to a different type of pins, we have also made changes to the grooves and material of the electrode holder. The ring with grooves is now made of bronze, which increases the product's efficiency and lifespan.

We have also introduced new item numbers for AutoGrind Digital V3:

Model	V/Hz	AutoGrind Digital V3	AutoGrind-S Digital V3
Item Number		Item Number	Item Number
UK	110V/50 HZ	88897871	88897891
UK	230V/50 HZ	88897876	88897896
EU	230V/50 HZ	88897874	88897894
US	110V/60 HZ	88897882	88897895

It is important to note that all new AutoGrind orders from today will be delivered as the new variant, regardless of whether they are ordered under the previous item numbers.

Furthermore, there are new item numbers for the following parts:

AutoGrind Digital V3

Description	Old Item Number	New Item Number
Grinding Module	75550005	75560005
Electrode Holder	75550020	75560020
Axle Module	75550012	75560012

AutoGrind-S Digital V3

Description	Old Item Number	New Item Number
Grinding Module to UT-S	75551005	75561005
Electrode Holder UT-S 0.8-4.0 mm	75550120	75560120
Electrode Holder UT-S 4.8-8.0 mm	75551020	75561020
Axle Module UT-S	75551012	75561012

We kindly ask you to refer to the following PDF files: [AutoGrind Digital Product Sheet](#), [AutoGrind Digital Exploded-View](#) and [AutoGrind-S Digital Exploded-View](#).

The images and item numbers can also be found on the product page for [AutoGrind Digital](#) on our website and on the service page for [AutoGrind Digital](#) and [AutoGrind-S Digital](#).

Note: Original parts for the last version of AutoGrind can still be ordered and delivered. Therefore, both the new and old parts will appear in future price lists and continue to be displayed on our website under the above-mentioned links.

Repairs of the last AutoGrind version will, by default, be carried out with the original parts. However, you can request an upgrade to the new parts, as they are compatible. Please note that upgrading to the new AutoGrind requires the simultaneous purchase of a new electrode holder, as the new AutoGrind is not compatible with the old electrode holder.

If you have any questions or need further information, please feel free to contact us. We look forward to continuing our partnership with you and hope that these upgrades will make our products even more reliable and efficient.

Kind regards,

Inelco Grinders A/S
